Melvin Jackson

Cybersecurity Associate
Alexandria, VA | (703) 469-7026 | melvin11jackson@gmail.com | U.S. Citizen | linkedin.com/in/melvin-jackson

PROFESSIONAL SUMMARY

Cybersecurity associate with hands-on experience in vulnerability assessment, threat detection, security monitoring, and compliance across enterprise environments. Skilled at identifying and prioritizing security risks, conducting static and dynamic analysis, and communicating technical findings clearly to both technical and non-technical audiences. Passionate about building stronger security postures and growing in roles across multiple security domains.

TECHNICAL SKILLS

Languages & Querying: MongoDB, Python, and SQL
Cybersecurity Skills: Email Security, Threat Hunting, Application Security, Network Security, Digital Forensics, Cloud Security, Vulnerability Management, SIEM, NIST, and ISO 27001
Network & Systems: Encryption, Firewalls, Authentication, Perimeter Protection, TCP/IP, DNS
Security Tools: Nmap, OpenVAS, Tenable, SIEM
Operating Systems: Windows, macOS, Linux
Frameworks: NIST, MITRE ATT&CK, FedRAMP, Zero Trust Architecture, ISO 27001
Certifications: CompTIA Security+, AWS Certified Cloud Practitioner

EXPERIENCE

Cybersecurity Threat Researcher | *KnowBe4* | *Arlington, VA* Jul 2026 – Present

- Investigate phishing emails, analyze malware, and track threat campaigns within the KnowBe4 Threat Research Lab to identify emerging attack patterns and techniques.
- Label and classify thousands of emails daily to refine detection logic, contributing to a 30%+ reduction in false positives and false negatives and measurably improving the precision of the email security platform
- Analyze trends across large datasets to establish threat patterns across regions, industries, and business segments, contributing to threat intelligence functions across the organization.
- Deploy and configure security products including endpoint, email, web, and network protection to support threat research, and detection workflows.
- Triage, investigate, and respond to alerts from the KnowBe4 email platform and contribute to external-facing Threat Labs research content.

Mobile Application Security Intern | *NowSecure* | *Vienna, VA* Jan 2026 – Apr 2026

- Conducted static and dynamic analysis of Android and iOS applications to identify vulnerabilities, malicious behaviors, and security risks across mobile platforms.

Commonwealth Cybersecurity Initiative Intern | *InterSec* | *Leesburg, VA* Oct 2025 – Dec 2025

- Led a multi-phase AI risk and cybersecurity initiative evaluating governance controls, data management, and control effectiveness. Producing compliance findings and policy recommendations for senior leadership.

Vulnerability Assessment Team Intern | *Dept. of Homeland Security* | *Ashburn, VA* Jun 2025 – Sep 2025

- Conducted enterprise vulnerability assessments using Nmap, OpenVAS, and Tenable, identifying exposed services, misconfigurations, and high-risk vulnerabilities across large infrastructures.
- Analyzed CVE and CVSS data to build risk-prioritized remediation queues, supporting continuous security monitoring and incident triage workflows.
- Evaluated AI-enabled vulnerability management platforms, assessing detection capabilities and risk-prioritization algorithms. Delivering recommendations that improved remediation workflows and saved 100+ analyst hours.

PROJECTS

IT Consulting Capstone (Team Lead) | *ATCAP Home Healthcare Solutions* Aug 2025 – May 2026

- Led five-person team delivering three IT solutions for a healthcare client, including system architecture recommendations covering data management, security controls, and operational performance.

EDUCATION

Bachelor of Science in Information Technology, Concentration in Cybersecurity May 2026
George Mason University | *GPA: 3.7*
